

OOF

OO61

13 Jul 90

Summary of Information

EEI #1: When: Between 2100 14 Jul 90 and 1200 16 Jul 90
 with emphasis during early morning hours of
 15 Jul 90

Where:

EEI #2: $11^{\circ} 05' N$ $49^{\circ} 10' 30'' W$

EEI #3: Description: See diagrams pages 7 & 8.
 Target has a two tone hull and an
 off white or dirty tan superstructure.
 The hull is a medium shade of grey, brown
 or green. A darker portion occurs
 just below the gunwale in the bow.

There is a mast-like projection on the
 bow portion of the deck. However,
 something is peculiar about this, as if
 the mast has been 1) broken off 2) broken
 and repaired or 3) containing, or having
 attached to it, an object or apparatus
 that is not typically found on a "mast."
 (See page 7)

The superstructure (see page 8) is
 squat and ^{at least} two levels high. There
 are two circular black holes of round
 objects on the front of the superstructure
